

# The Universe Inside You: The Extreme Science of the Human Body From Quantum Theory to the Mysteries of the Brain

Brain sequel to his best-selling Inflight Science, Brian Clegg offers a spectacular tour through the human body. He explores mitochondria, in-cell powerhouses once separate creatures; how your eyes consume million-year-old photons of light; your many senses, which include the ability to detect warps in space and time; and why meeting an attractive person can turn you into a gibbering idiot. Brian Clegg is a science writer who lives in Wiltshire, England. His previous books include Before the Big Bang (St Martins Griffin, 2011) and Inflight Science (Totem Books, 2011).
