

# License to Orbit: The Future of Commercial Space Travel (Apogee Books Space Series)

Two leading experts on space systems with decades of experience in the field provide important and current insights on developments in today's commercial space industry in this ambitious and extensively researched examination. The authors look at the lives, ambitions, and struggles of the billionaires funding and supporting this industry, while also examining the nature of the strained relations and alternative goals of space agencies versus the private space flight industry. The analysis even includes descriptions of the amazing new technologies that could revolutionize space exploration and space industries in the coming decades.
