

Patterns of Light: Chasing the Spectrum from Aristotle to LEDs

Any student or engineer working in optics or the field of laser technology will find this a fascinating read. The book begins by addressing the properties of light as seen in the everyday world: events such as refraction in a pool, lenses in the form of glasses, the colors of objects, and atmospheric events. Latter chapters explain these events at the atomic and subatomic level and address the use of electron and optical microscopy in observing the worlds unseen by the unaided eye. Exercises and activities will be found in an appendix, but the primary volume can stand alone if the reader so desires.

semenj.si DOMOVSEMENJPRIDRUI SEO PROJEKTUKONTAKT SEMENJ.SI NAJ DEDIÄ...Ä;Ä,,Ä•INA NE GRE V POZABO VSTOPI V SEMENJ Picture Projekt vzpostavlja lokalno partnerstvo med projektnimi partnerji in Ä;e neidentificiranimi upravljavci pojavov dediÄ;ine, ki bodo v skladu z rezultati projekta dolgoročno sodelovali pri izvajanju skupnih akcij. ponudniki storitev Ste lastnik stare stavbe ali nosilec tradicionalnih znanj (po starem izdelujete razne uporabne ali okrasne izdelke) pripovedujete zgodbe in pravljice, se spoznate na zdravljenje z zeliÄ;i, pojete ljudske pesmi, Ä;e veste, kako so potekale Ä;ege in navade vasih, znate spei kruh in potico in bi radi svoje vedenje in znanje prenesli tudi obiskovalcem in oblikovali turistini produkt?
