

# DIY - Complicated Math Concepts: Do-It-Yourself Notebook Algebra, Geometry & Calculus - Make Your Own Book (Notebooks for Creative People) (Volume 14)

This notebook is designed for middle-school and high-school homeschooling. The student will use this blank book template for their own writing and illustrations. Students take their work more seriously when they feel like they are creating something real. If math is part of this year's homeschooling plan this book will be very popular with your student. There are many Make Your Own Book topics to choose from. Use them for unit studies on a variety of homeschooling subjects. These books should be used with a stack of library books. If you can't get to the library you can study your topic online and record what you learn into this real book. Not just a boring book report - these little DIY books become treasures. Not just for students! Anyone who loves to write and has always wanted to be an author, poet or illustrator can take the next step with this real book template. Be sure to check out all of Sarah Janisse Brown's beautiful books for creative thinkers, homeschoolers, moms, and dyslexics! By - The Thinking Tree Publishing Company. This book is lovely. If you use it for all your complicated math concepts, lessons and problems you will remember things because of the beauty of the pages. You can be creative with this notebook. Take it to class with you.
