

Geodynamics of the Western Pacific-Indonesian Region (Geodynamics Series)

Published by the American Geophysical Union as part of the Geodynamics Series, Volume 11. The contributions to this volume have been organized into two categories: General Studies, which deal with the dynamic processes, and the systematic geological and geophysical relationships of importance to the region as a whole; and Regional Studies, which focus on specific areas and features of the Western Pacific. The composition of the volume reflects the research efforts undertaken in the Western Pacific within the framework of the Geodynamics Project, by the countries of the region and by other countries concerned with the geodynamics of the Western Pacific. The new understanding of the dynamics and development of the trench-arc-backarc systems, and the dynamic relationship of the Western Pacific basin lithosphere and ancient continental margins with trench-arc-backarc development, brought about through the Geodynamics Project, is a major advancement in the geosciences. Much of these new findings is contained in this volume. The editors wish to thank all of the authors for their outstanding contributions, and for their patience with the editing process and assembly of the publication.

PÅjevo 11a 4000 Kranj info@dvzu.si 041 639 407 Picture Razumevanje in vrednotenje elementov kulturne dediščine je potrebno za oblikovanje in trenje turistine ponudbe. Projekt SEMENJ.SI spodbuja kulturni turizem in se ukvarja s prepoznavanjem in identifikacijo kulturne dediščine in njenih nosilcev in jih usposablja za predstavitev le te obiskovalcem. Na drugi strani se povezuje s turistinim gospodarstvom in vzpostavlja register ponudnikov dediščine za nadgradnjo turistine ponudbe. Picture Picture Create a free web site with Weebly
