

Planet Earth: A Beginners Guide (Beginners Guides)

In this incredible expedition into the origins, workings, and evolution of our home planet, John Gribbin, bestselling author of *In Search of Schrödinger's Cat*, *The Scientists*, and *In Search of the Multiverse*, does what he does best: taking four and a half billion years of mind-boggling science and digging out the best bits. From the physics of Newton and the geology of Wegener, to the environmentalism of Lovelock, this is a must read for Earth's scientists and residents alike. Trained as an astrophysicist at Cambridge University, John Gribbin is currently Visiting Fellow in Astronomy at the University of Sussex, England.
